Degenomics (DGN) Litepaper Version 1 | March 2025

Power to the Degens. Govern the Future.

Loading…

1. Introduction Degenomics (DGN) is an innovative token on the Base chain, focused on empowering a decentralized investment ecosystem. By integrating community-driven governance with an interactive NFT-based leveling system, Degenomics seeks to fund and incubate promising Web3 projects while engaging its community through meaningful participation and transparent decision-making.

Key Features:

- Investment DAO for transparent, community-driven funding.
- Interactive NFT Leveling System to reward active participation.
- Dedicated R&D Fund supporting innovative Web3 projects.
- User-friendly Web UI with customizable widgets.
- Incubation Station fostering innovation within the ecosystem.

2. Vision and Mission Vision: Degenomics envisions empowering decentralized communities with resources and tools to incubate, fund, and propel innovative Web3 initiatives, ensuring fair rewards for participants and investors.

Mission:

- Empower Investors by reducing barriers to decentralized investments.
- Drive Innovation by funding promising Web3 solutions.
- Reward Engagement through interactive NFT frameworks.

Governance: The Investment DAO

3. Community Voting The Investment DAO coordinates funding for emerging Web3 projects. DGN holders propose and vote, ensuring community-driven, transparent decision-making.

Process:

- Proposal Submission: Open to all DGN holders.
- Voting Period: 48 hours for casting votes.
- Approval: Successful proposals receive funding from DAO treasury.

3.1 R&D Fund The treasury includes a dedicated R&D fund to:

- Develop tools, dashboards, and analytics.
- Incubate and support early-stage Web3 startups.
- Enhance ecosystem infrastructure and partnerships.

NFTs and Leveling System

4. Degenomics NFTs evolve based on user activity, visually reflecting user engagement.

4.1 Leveling Mechanics

- Governance Participation: Increases NFT levels through voting.
- Platform Interaction: Trading and other activities enhance NFT progression.
- Rewards: Higher levels unlock governance privileges, exclusive airdrops, and early platform feature access.

4.2 NFT Expansion Initial "Gen Mint" introduces the core NFT collection, with future expansions offering new designs, functionalities, and engagement opportunities.

More details TBA

Tokenomics

5. Overview

- Token Name: Degenomics
- Ticker: DGN
- Blockchain: Base chain
- Total Supply: 100,000,000 DGN
- Launch: Fair Launch
- Liquidity: Locked

5.1 Distribution

- No team or private allocation; entire supply publicly available.
- Uniform distribution ensures equal market access.

5.2 Transaction Fees and Marketing

A 0.5% fee funds a marketing wallet used for:

- DAO Treasury
- Promotion and partnerships.
- Community engagement and events.

5.3 DGN Use Cases

- Governance voting and R&D allocations.
- Staking for additional rewards.
- Primary currency within DGN treasury and reward systems
- NFT minting and upgrading.

Web UI & Customizable Widgets

Dashboard Intuitive dashboard enabling users to:

- Manage governance participation.
- Monitor tokens and NFTs.
- Execute and manage trades.

6. (Coming Soon) Bag Tool Customizable widgets for advanced users, including portfolio management, analytics, trading bots, and price tracking.

6.1 RIP Bot Integration - Automated Telegram bot to influence community decisions, supporting strategic trading and active engagement. More info TBA.

Incubation Station -

Supporting Innovation Incubator for startups and decentralized apps (dApps), leveraging community resources for successful launches.

7. Voting Structure The community can initiate incubation project proposals via polls:

- Proposal Poll Creation: Open to all DGN holders.
- Voting Period: 48 hours for community voting.
- Approval Criteria: Requires a minimum 90% "Yes" vote for approval.

7.1 Resources Provided

- Funding through Investment DAO and R&D Fund.
- Technical assistance and auditing.
- Mentorship, networking, and strategic collaborations.

Roadmap

Phase 1: Genesis

- Fair launch on Base chain.
- DAO formation and initial governance setup.
- RIP Bot Integration

Phase 2: Expansion

- Initial NFT mint with basic leveling.
- Initial R&D fund deployment.

Phase 3: Incubation

- Launch of Incubation Station.
- First startups onboarded for support.
- Enhanced NFT leveling system.
- DGN platform release

Phase 4: Maturation

- Expanded NFT collections and functionalities.
- Advanced governance structures and staking rewards.
- Additional community-driven features and integrations.

Conclusion:

Degenomics is dedicated to reshaping decentralized investment, incubation, and governance. By combining community-driven DAO governance, interactive NFTs, robust tokenomics, and accessible Web3 tools, Degenomics creates an ecosystem ripe for innovation and collective success.
